

Piute Ponds

My favorite primary grade experience was in second grade when my teacher was Mrs. Grubb. She spent a lot of money and time so we would go to Piute Ponds once a month. At Piute Ponds she always let us use binoculars to look at the birds. Mrs. Grubb made us cool clipboards to tally how many birds we saw.

At Piute Ponds we always learned a lot and didn't even realize it. It was like Mrs. Grubb made it our classroom for the day. We learned about science because she showed us all the different birds and different types of environments. We learned about math because we tallied how many birds we saw and then at the end of the year we made graphs. In language arts we always wrote about the trip when we got back to the classroom.

Even when we were in our classroom she still made us feel like we were outside and at Piute Ponds. She brought cool rocks from Piute Ponds and feather from all the different birds. She had actual animals that used to be alive in her classroom for us to study. She would teach us how to draw the birds and animals we saw.

Piute Ponds will always be my favorite second grade experience and Mrs. Grubb is one of my favorite teachers ever!
